Title: (ex: "The Necklace" Vocabulary Test Corrections)

1. Write "Correction #1"

A. Type out the sentence with the incorrect answer underlined, and note it as incorrect. (Ex: The child was crying tumultuously (incorrect answer)).

B. On the next line, state what the correct answer is and underline it; give a brief explanation of why this is the correct answer.

C. On the next line, use the word correctly in an original sentence (can be modeled after the one in the text).

Here is what it should look like:

Correction #1

- A. The child was crying tumultuously (incorrect answer).
- B. The correct answer is hysterically, because hysteria has to do with loss of control of one's emotions, while tumultuously typically has to do with disorderly and chaotic movement.
- C. The child cried hysterically until the toy was returned to her.

Correction #2

Repeat the steps above...

PLEASE NOTE: You will get back half the points you lost on the test if you complete the test corrections in the format above. If you partially follow the formatting, you may receive some credit. There will be no makeups or extensions for test corrections, sorry.
