COVID-19
Free At Home Non-Invasive Testing Partnering With Mount Sinai Hospital

Testing program designed to be highly effective and non-invasive. Unlike rapid tests, we can identify individuals with COVID-19 who have early or no symptoms and detect the variant in positive samples using saliva samples through a contactless, rapid process.

In order to prevent spread of COVID-19 in schools and keep one another safe, all unvaccinated employees and students must show proof of a negative test. **All employees are required to participate in this program.**

How it works:

+ **Pick up saliva test kit at school**

+ **Complete saliva test at home**

+ **Drop it back off at the designated dropbox**

+ **Use app to pair your kit by scanning QR code**
