

# Create and Print IXL Quiz

Teachers can now create a quiz and print out all the questions as a PDF document.

## Schoology Assignments

**Annotation Assignments** allow you to upload multiple types of documents into Schoology, and have students annotate them in a wide variety of ways.

Once assigned to a student, they will be given their own copy of the file. Students will be able to then underline, highlight, cross out, type, or draw on the document. Teachers can see the annotations done by students and add comments and a grade.

**OneDrive Assignments** are similar to annotated assignments above however these assignments are linked to a teachers YPS OneDrive. The pro of this assignment is that each student gets their own copy of a Microsoft document. (Word/PowerPoint.)

## TalkingPoints (Similar to REMIND)

Free online platform used to communicate with parents in various languages via text message. Simply create a class and then add your students' parent/guardian contact information.
