

Clever Password

Each student has a **6-digit ID** (+yonkerspublicschools.org) for the **username**. The passcode is the same one they would log into a computer. **However**, students may forget their passcodes, or their teachers may have changed them. In the event this occurs, **students can now type in their birthdates as their passcodes if they forget their passcodes**. There are also hints that will pop up to prompt students to type in their birthdates (If today was a student's birthday – 03162020).
