How Tall?

For Parents

How Tall?

Measure each flower. Then, write how tall it is on the line underneath. Ask your child, *Which flower is the tallest? How do you know?* See if your child can come up with different ways to measure the flowers. Use the ruler on the side to help you. Discuss how the numbers help prove which flower is tallest. Talk about measuring. Share some of the different instruments you use to measure in your home (scale, measuring cup, rulers). Let your child explore how to use them.
