For Parents

My 100 Chart

In February, many schools and day-care facilities celebrate the 100th day of school. Challenge your child to look at the chart and find different patterns. For example, he or she might notice that the last digits in the vertical columns are the same; the numbers increase by 10 in each vertical column.

Use the chart to practice counting forward and backward. You can encourage your child to count by 5s or 10s. Or you can try adding and subtracting using the chart.
