Compare 54,515 and 54,233. Use $>$, $<$, or $=$.

Use a number line.

54,515 is to the right of 54,233 on the number line.

So, $54,515 > 54,233$.

Practice

For Exercises 1–2, use the number lines to compare. Use $<$, $>$, or $=$.

1. $67,113 \bigcirc 62,523$

2. $42,254 \bigcirc 42,533$

Compare. Use $<$, $>$, or $=$.

3. $\$751,012 \bigcirc \$715,012$

4. $4,350 \bigcirc 5,430$

5. $8,080 \bigcirc 8,880$

6. $322,650 \bigcirc 332,650$

7. $673 \bigcirc 376$

8. $\$918,050 \bigcirc \$819,050$

9. $121,571 \bigcirc 211,571$

10. $17,888 \bigcirc 17,780$

11. $72,770 \bigcirc 72,770$

Problem Solving

Mathematical

- 12. PRACTICE** **Draw a Conclusion** Gigi has \$1,698 in her savings account. Robert has \$1,898 in his savings account. Toby has \$100 less than Robert in his savings account. Who has the least amount of money?
- _____

- 13.** There were 544,692 tickets sold for the rock concert. There were 455,692 tickets sold for the country music concert. Which concert sold a greater number of tickets?
- _____

Vocabulary Check

- 14.** Choose the correct word(s) to complete each sentence.

is equal to ($=$)

is greater than ($>$)

is less than ($<$)

number line

To compare numbers, you can use a _____. A number that is to the right on a number line _____ a number to its left. A number on the left _____ a number to its right.

You can look at place values to compare numbers. If a number has a digit in the thousands place that _____ the thousands digit in another number, then look to the hundreds place.

Test Practice

- 15.** Which number sentence is *not* true?

- (A) $243,053 < 242,553$
- (B) $194,832 > 193,832$
- (C) $553,025 = 553,025$
- (D) $295,925 < 295,952$

Name _____

Order Numbers

Lesson 4

ESSENTIAL QUESTION ?

How does place value help represent the value of numbers?

You can use a place-value chart to put numbers in order.

Math in My World

Example 1

Compare the populations of the three cities and order them from *greatest* to *least*.

1 Write the populations on the place-value chart.

2 Start with the greatest place-value position. Compare.

_____ > _____

3 Compare the digits in the next place.

_____ = _____

4 Continue to compare until the digits are different.

_____ > _____

_____ > _____ > _____

So, from *greatest* population to *least*, the order of the cities is

_____, _____, and _____.

Thousands			Ones		
hundreds	tens	ones	hundreds	tens	ones

Example 2

Order the numbers on the cards at the right from *least* to *greatest*.

245,032

254,002

1

Line up the numbers by the ones place.

245,023

2

Start with the greatest place-value position. Compare.

Each number has a _____ in the hundred thousands place. So, compare the digits in the ten thousands place. The greatest number is _____.

The two numbers that are left both have a _____ in the thousands place and a _____ in the hundreds place.

The second greatest number is _____.

So, in order from *least* to *greatest*, the numbers are _____.

Talk MATH

When ordering numbers, what do you do when the digits in the same place have the same value?

Guided Practice

1. Place the numbers in the place-value chart in order from *greatest* to *least*.

52,482

50,023

56,028

63,340

greatest →

← least

Thousands			Ones		
hundreds	tens	ones	hundreds	tens	ones

Name _____

Independent Practice

Place the numbers in the place-value chart in order from *greatest* to *least*.

2. 12,378
12,783
12,873

greatest →

least →

Thousands			Ones		
hundreds	tens	ones	hundreds	tens	ones

3. 258,103
248,034
285,091
248,934

greatest →

least →

Thousands			Ones		
hundreds	tens	ones	hundreds	tens	ones

4. 138,032
138,023
139,006
183,467

greatest →

least →

Thousands			Ones		
hundreds	tens	ones	hundreds	tens	ones

5. 652,264
625,264
652,462
625,642

greatest →

least →

Thousands			Ones		
hundreds	tens	ones	hundreds	tens	ones

Order the numbers from *least* to *greatest*.

6. 402,052; 425,674; 414,035

7. 643,947; 643,537; 642,066

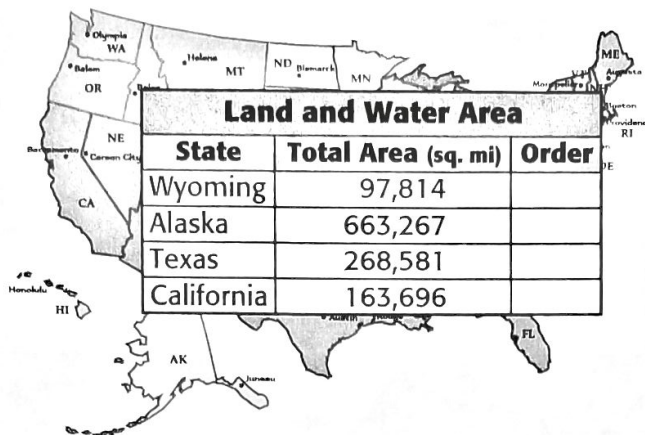

8. 113,636; 372,257; 337,633

9. 563,426; 564,376; 653,363

Problem Solving

- Mathematical
10. PRACTICE 2 **Stop and Reflect** Order the states from *least* (1) to *greatest* (4) total area.

- 11.** Order the dog breeds from *least* popular (1) to *most* popular (3).

Dog Breeds		
Dog Breed	Number	Order
Yorkshire Terrier	47,238	
Beagle	42,592	
German Shepherd	45,868	

HOT Problems

- Mathematical
12. PRACTICE 1 **Keep Trying** Use the digits 2, 3, 4, 5, and 9 to create four 5-digit numbers. Use each digit exactly once in each number. Order them from *least* to *greatest*.

- 13. ?** **Building on the Essential Question** When do I compare real-world numbers?

My Work!
