

# Inventions

Lexile Level: BR-220

In every day in all that you do,

an invention is there to help you.

**Inventions like these are ones that  
will last.**

This was invented way back in our  
past.

This kind of invention will take you  
far.

People once lived without plane,  
train or car.

When you want to talk to a friend  
faraway,

use these inventions to hear what  
they say.

Before this invention, we could not see at night.

**Now flip a switch. There will be  
light!**

**Inventions solve problems. We  
know this is true.**

Is there an invention inside of you?
