

All Blue and Green

Lexile Level: BR-220

This is our planet,
all blue and green.

Is it the prettiest one that
you've seen?

Look at it's shape.
We call it round.

Our planet is made of
water and ground.

**Point to the water.
It's the part that is blue.**

Most of the water is oceans.
It's true.

Our planet is home to all
living things.

On the ground, in the sea and
flying with wings.

What do we call this land, water
and air?

**We call it Earth.
It's the home that we share.**
