

**{FREE} TEACHING TEST-TAKING  
STRATEGIES POSTERS**

**I. Read through  
the entire problem  
(including the answer  
choices).**

Why? You want to get a general understanding  
of what the problem is all about.

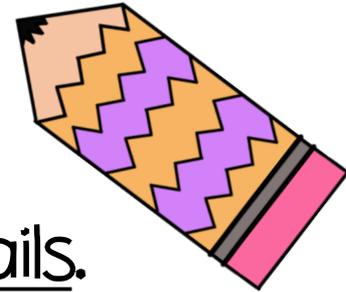

2. Ask yourself,  
“What is the question  
REALLY asking me?”

Why? You need to determine what the problem  
is actually focusing on.

3. Read the problem again.  
Look for keywords that will  
help you understand the  
question AND the answer  
choices.

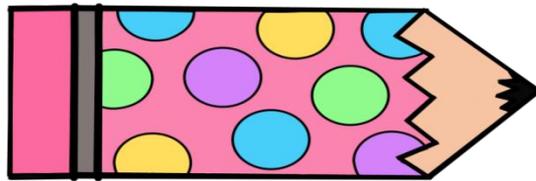

Underline important details.

Circle numbers and words that are extra important.

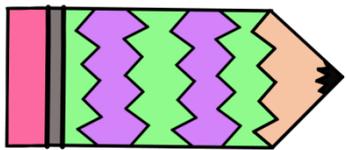

Why? You only need to focus on the good stuff!

4. Analyze the  
answer choices and  
eliminate as many as  
you can.

Why? By eliminating, you are saving the best  
for last!

5. Choose the best  
answer or make your  
best guess after  
narrowing down your  
choices.

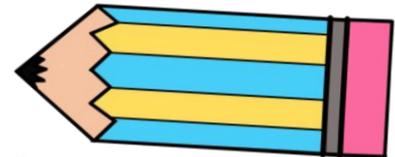

Why? You've done most of the work, now you  
can move to the last strategy!

# 6. Go back and review the original question.

Does your answer choice make sense?

Why? Remember strategy #2 when you said,  
"What is this question REALLY asking me?"

Make sure you ANSWERED that!

# My Disclaimer - Important!

Below is my disclaimer! Please read the following carefully.

These strategies are intended for multiple-choice questions, but as I will mention later, can also be adapted to fit other types of questions as well.

It is NOT research-based. It is simply a resource I created to share what has worked for me in MY classroom with MUCH practice throughout the year, and is part of my Teaching Test-Taking Strategies Guided Toolkit.

I make no claims that you will see increased test scores by using this resource.

This is part of a collection of strategies and procedures that I have put together to increase my students' success in problem solving multiple choice word problems. **They may seem like common sense, and they probably are! However, I believe that many teachers are looking for help in implementing test-taking strategies at a variety of grade levels.**

**Please see my [Teaching Test-Taking Strategies Guided Toolkit](#) for full information, including the resources needed for implementation of these strategies through a Question of the Day routine.**

**Thanks for downloading! 😊**
